DESIGN REFERENCE DOCUMENT · PART B

Premium UI/UX Theme Guide

TransitOps — Smart Transport Operations Platform. The complete visual design system: color palette, typography, spacing, elevation, and component library.

PROJECT	DOCUMENT TYPE	BASED ON	VERSION
TransitOps	**UI/UX Theme**	**PRD v1.0 & TRD v1.01**	**1.1**

PART B — PREMIUM UI/UX THEME

Design Principles & Color System

01 · Operational Clarity First
Every screen answers "what needs my attention right now" — status colors and KPI cards always outrank decorative elements.

02 · Confident Restraint
One accent color (amber) is reserved strictly for primary actions and highlights — never used decoratively.

03 · Status Is Always Visible
Vehicle, driver, and trip states use consistent color-coded pills everywhere they appear — dashboard, tables, and detail views.

04 · Dense but Breathable
Data-heavy tables use tight rows with generous column padding, not sparse-but-scrolling layouts.

Primary Palette

Midnight Navy	Deep Navy	Steel Blue	Amber Accent
#0B1B33	#142A4D	#1B3A63	#F5A623
Cover / hero backgrounds	Primary buttons, nav bar	Borders, secondary UI	CTAs, highlights only

Semantic / Status Colors

Success / Available	Warning / On Trip	Caution / In Shop	Danger / Suspended
#0F9D63	#B5680A	#C2410C	#EF4444
Available status, positive KPIs	On Trip, in-progress states	Maintenance / In Shop	Suspended, cancelled, errors

Neutrals

Ink	Slate	Border	Surface
#101728	#4A5468	#E4E8F0	#F7F9FC
Primary text	Secondary text	Card / table borders	Page background, zebra rows

PART B — PREMIUM UI/UX THEME

Typography & Spacing System

Type pairing: Headings use Poppins (geometric, confident, great at large sizes); Body / data uses a clean grotesque sans (high legibility in dense tables).

Type Scale

H1 / 32px / 600	**Fleet Overview**
H2 / 22px / 600	**Vehicle Registry**
H3 / 16px / 600	**Trip TRIP-0042**
Body / 12.5px / 400	Cargo weight must not exceed the vehicle's maximum load capacity.
Caption / 10px / 500	**Last updated 2 minutes ago**
KPI Number / 28px / 700	**86%**

Spacing Scale (4px base unit)

48121624324864

Use 8/16/24 for component padding, 32/48/64 for section and page-level rhythm.

Corner Radius & Elevation

Token	Value	Used On
radius-sm	8px	Buttons, inputs, status pills
radius-md	12px	Cards, KPI tiles, modals
shadow-card	0 3px 10px rgba(16,23,40,0.05)	Cards, KPI tiles
shadow-modal	0 12px 32px rgba(16,23,40,0.18)	Dialogs, dropdown menus

Responsive Breakpoints

Breakpoint	Width	Layout Behavior
Mobile	< 640px	Single column, nav collapses to bottom/hamburger, KPI cards stack
Tablet	640–1024px	2-column KPI grid, tables scroll horizontally
Desktop	> 1024px	Full sidebar nav, 3–4 column KPI grid, full tables

PART B — PREMIUM UI/UX THEME

Component Library

Buttons

Dispatch Trip | + Register Vehicle | View Details | Suspend Driver

Status Pills

Available | On Trip | In Shop | Retired | Suspended

KPI Cards (Dashboard)

ACTIVE VEHICLES	FLEET UTILIZATION	ACTIVE TRIPS	DRIVERS ON DUTY
142	78%	36	58
↑ 4 this week	↑ 3.2%	12 pending	↑ 2

Form Inputs

Registration Number	Cargo Weight (kg)
GJ-01-AB-4521	450

Data Table Row (Vehicle Registry)

Reg. Number	Model	Type	Capacity	Status
GJ-01-AB-4521	Tata Ace	Van	750 kg	Available
GJ-05-CD-1187	Ashok Leyland	Truck	3,500 kg	On Trip
GJ-03-XY-9002	Mahindra Bolero	Pickup	1,200 kg	In Shop
